

CLASSES VISITED: II YEAR ECE (SECTION A, B and C)

DATE of VISIT: 19.09.2024, 20.09.2024 and 23.09.2024

An industrial visit to the Air Traffic Management (ATM), Communication Navigation Surveillance (CNS), and the Airport Authority of India (AAI) yield several valuable outcomes:

1. **Understanding Operations:** Participants gain insights into the day-to-day operations of air traffic management, including how CNS systems ensure safe and efficient air travel.
2. **Technical Knowledge:** Exposure to advanced technologies used in aviation, such as radar systems, communication protocols, and navigation aids, enhances technical understanding.
3. **Safety Protocols:** Learning about safety measures and regulatory compliance helps participants appreciate the critical importance of safety in aviation operations.
4. **Career Insights:** Students or professionals can explore potential career paths within the aviation sector and understand the skills needed to succeed in this field.
5. **Networking Opportunities:** Meeting industry professionals can lead to valuable connections for future internships or job opportunities.
